

# SEND YOUR GUEST A TEMPORARY ENTRY CODE IN SECONDS

Smart, Seamless, Secure Entry

## FEATURES

Tap2Open's Smart Keypad allows residents to include a unique and temporary PIN code in invitations sent to guests who may not have a smartphone, or to vendors with rotating staff. Unlike other entry systems with PIN code access, Tap2Open's Smart Keypad solution follows any rules set by the resident such as schedules and accessible entrances. Access can also be instantly revoked or modified in seconds.

### ACTIVITY LOG

Detailed logs of access granted are automatically recorded and accessible to residents as well as community management

### SCHEDULE

Residents have the ability to create invites for future events, create recurring schedules useful for service workers, and edit access

### SECURITY

Easily crackable "Master Codes" are a thing of the past! Each guest can be issued a unique, temporary, and trackable PIN code

Smart Keypad works along side Tap2Open's cloud-based entry solutions; making it ideal for communities with multiple entry points, and mixed age groups.
